RE: Site Inspection, Allroc Products LLC, Allroc Pit A, S/035/018, Salt Lake County, Utah

Date of Inspection: March 20, 2003  
Time of Inspection: 9:00 a.m.  
Conditions: Cool, Sunny  
Participants: Rick Morgan, Allroc; Doug Jensen, Paul Baker, Lynn Kunzler, DOGM

**Purpose of Inspection:**

To ascertain whether the portion of the site that will be mined under this permit application is less than 5 acres.

**Getting to the site:**

The site is located on the north end of Beck Street

**Observations:**

The area in which this SMO is located is within a large sand and gravel pit. Allroc was leasing this property and had been producing sand and gravel for customers in the Salt Lake Valley. Recently the property owners sold this property to Lakeview Rock Products and Allroc is in the process of removing their operation.

As a part of the sales agreement, Allroc has committed to leave a 100,000 ton stockpile of crushed rock when they finally leave the site. The 5 acre parcel outlined by the SMO is the crusher, stockpile and mine area which they will need to produce this material.

There is also a large stockpile of asphalt material from highway construction projects and a smaller pile of reject concrete which have to be removed from the site. These piles were not included in the permit area because they are not a part of the operation that we would regulate. Allroc is in the process of running these products through a rod mill and selling the crushed material to Staker.

The Division performed a GPS survey of the site and produced a map, which is attached to this inspection memo.

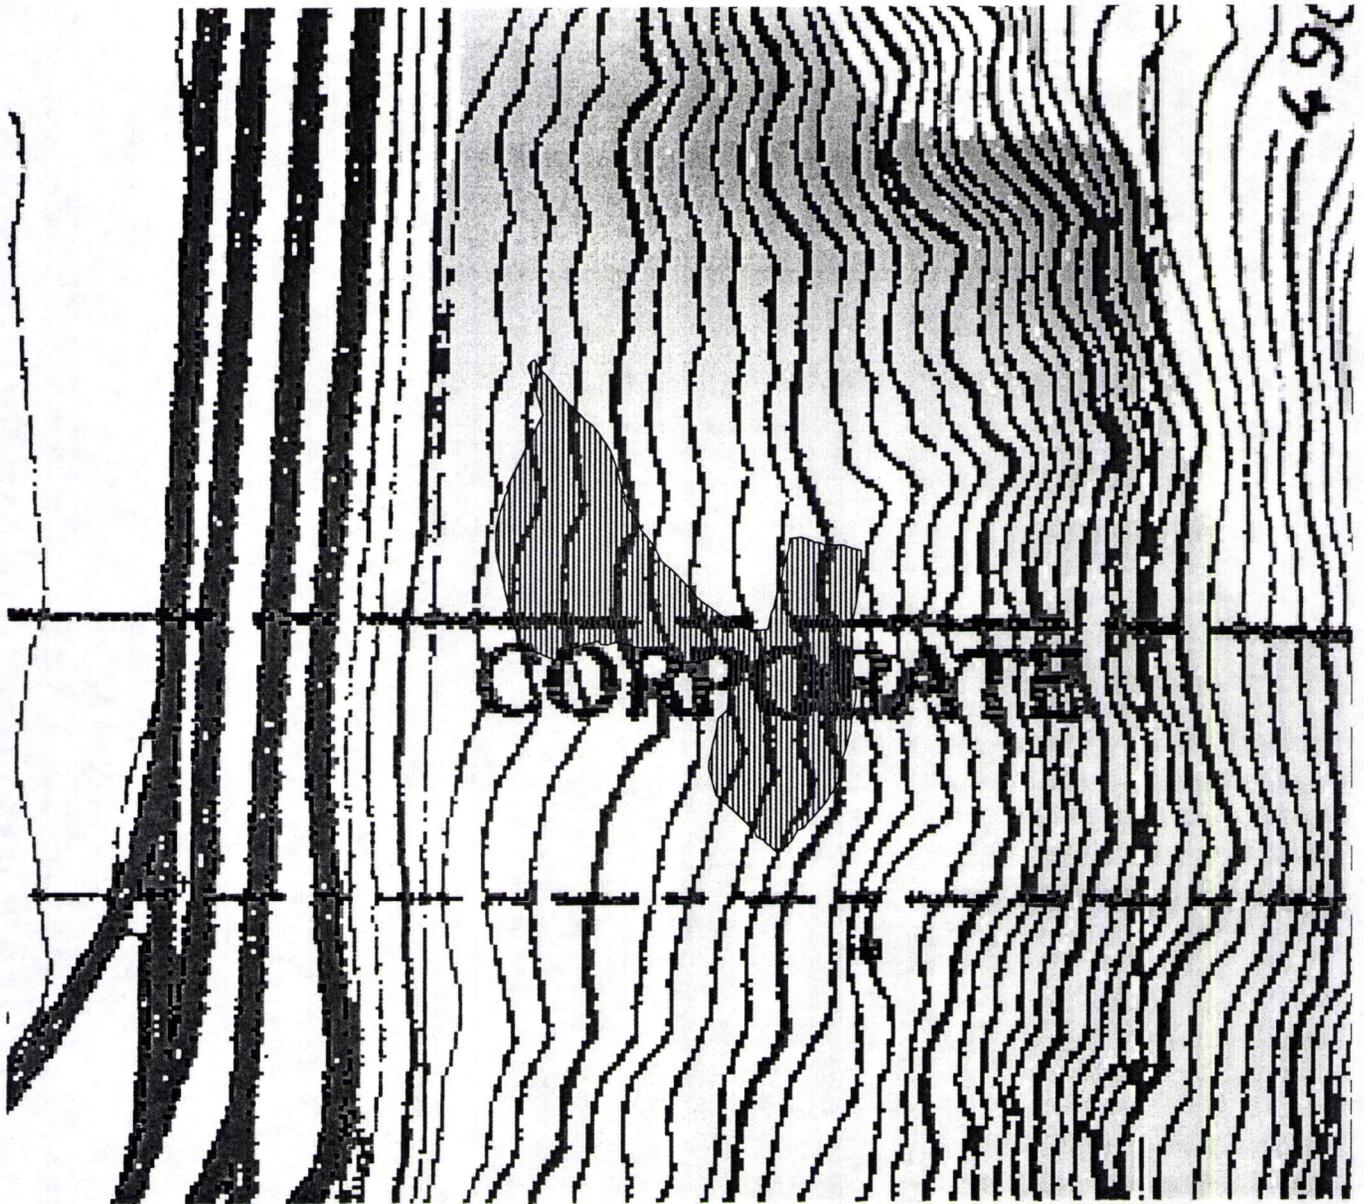

**Conclusions and Recommendations:**

We informed Allroc that markers that would need to be placed to outline this 5-acre permit area.
